GitLens — Supercharge Git in VS Code
Supercharge Git and unlock untapped knowledge within your repo to better understand, write, and review code. Focus, collaborate, accelerate.
GitLens is a powerful open-source extension for Visual Studio Code built and maintained by GitKraken.
Enhance your workflows with powerful Git functionality like in-editor blame annotations, hovers, CodeLens, and more—all fully customizable within VS Code. Try GitLens Pro's advanced workflows that accelerate PR reviews, provide rich interactive Git actions, and enhance collaboration for you and your team.
Getting Started
Install GitLens by clicking Install on the banner above, or from the Extensions side bar in VS Code by searching for GitLens.

Path Intellisense
Visual Studio Code plugin that autocompletes filenames.
Installation
In the command palette (cmd-shift-p) select Install Extension and choose Path Intellisense.
To use Path Intellisense instead of the default autocompletion, the following configuration option must be added to your settings:
{ "typescript.suggest.paths": false }
{ "javascript.suggest.paths": false }

Ratings
This extension contains code snippets for JavaScript in ES6 syntax for Vs Code editor (supports both JavaScript and TypeScript).
Note
All the snippets include the final semicolon ; There is a fork of those snippets here made by @jmsv where semicolons are not included. So feel free to use them according to your needs.
Sponsors
Request and perform code reviews from inside your IDE. Review any code, even if it's a work-in-progress that hasn't been committed yet, and use jump-to-definition, your favorite keybindings, and other IDE tools.
